

Local Area Personal Income, 1991–93

THIS REPORT PRESENTS new estimates of personal income and per capita personal income for local areas—that is, for counties and metropolitan areas—for 1993 and revised estimates for 1991–92. It also discusses the sources of the revisions to the local area estimates for 1991–92.

Table 1 presents estimates for the metropolitan areas, including the new Hattiesburg, Mississippi, metropolitan statistical area (Forrest and Lamar Counties), which was defined by the Office of Management and Budget in July 1994. The metropolitan areas in all States, including the States of the New England region, are defined in terms of counties and county equivalents. For the New England region, the preferred definitions of the metropolitan areas are in terms of cities and towns, but the available data for cities and towns are not sufficient to prepare estimates of personal income.¹

Table 2 presents estimates for counties and county equivalents. For Virginia, estimates are presented for the larger independent cities as well as for most counties; estimates for the smaller independent cities are combined with estimates for adjacent counties.

1. The list of the metropolitan areas and their constituent counties is available from the National Technical Information Service (NTIS) in hard copy (Accession No. PB 94-165-628) and in electronic format (Wordperfect 5.1, Accession No. PB 94-501-707). Write to NTIS, Document Sales, 5205 Port Royal Road, Springfield, VA 22161, or call (703) 487-4650.

Revisions to the estimates

The estimates for 1991–92 were revised to reflect the revision of the State estimates of the components of personal income that were released in August 1994 and the routine incorporation of source data that are more current than the data that were available when the 1992 local area estimates were prepared.² The incorporation of new source data mainly affected the estimates of nonfarm proprietors' income, of dividends, interest, and rent, and of the residence adjustment, which is the net inflow of the earnings of interarea commuters.

The 1991–92 estimates of nonfarm proprietors' income were revised to incorporate 1991 data on the number of small establishments by industry from the Census Bureau's *County Business Patterns*.

The 1992 estimates of dividends, interest, and rent and of the residence adjustment were revised to incorporate Internal Revenue Service tabulations of individual income tax return data for 1992.

2. See "State Personal Income, Revised Estimates for 1991–93," SURVEY OF CURRENT BUSINESS 74 (August 1994): 64–79.

In addition, both the State and the local area estimates of per capita personal income for 1990 have been recomputed to reflect revised Census Bureau estimates of population. The State estimates of per capita personal income are included in **table 3** of "Total and Per Capita Personal Income by State and Region" in this issue; for the availability of the local area estimates, see the next section.

Acknowledgments

The revised estimates of local area personal income were prepared by the Regional Economic Measurement Division under the direction of Linnea Hazen, former Chief. The preparation of the estimates was a divisionwide effort.

Estimates of nonfarm labor earnings (wages and salaries and other labor income) were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, Lisa C. Ninomiya, Michael G. Pilot, John A. Rusinko, and James M. Scott. Contributing staff members were E. Frances Bake, Christopher T. Berry, Lisa A. Bradburn, Susan P. Den Herder, Elizabeth A. Freeman, Lela S. Lester, Russell C. Lusher, Richard A. Lutky, Paul K. Medzerian, Mauricio Ortiz, Michael Phillips, William E. Reid, Jr., Lori A. Riegert, Victor A. Sahadachny, and Jaime Zenzano.

Estimates of farm earnings (wages and salaries, other labor income, and proprietors' income) and the residence adjustments were prepared by the Quarterly Income Branch under the supervision of Robert L. Brown,

Assistant Division Chief. Major responsibilities were assigned to James M. Zavrel. Contributing staff members were Elaine M. Briccetti, Daniel R. Corrin, Richard H. Grayson, Michael S. Wagner, and Daniel Zabronsky.

Estimates of nonfarm proprietors' income, dividends, interest, rent, transfer payments, and personal contributions for social insurance were prepared by the Proprietors' Income Branch. Major responsibilities were assigned to Charles A. Jolley. Contributing staff members were Sean P. Collier, Catherine A. Cumberland, Toan A. Ly, Ellen M. Wright, and Marianne A. Ziver.

The public use tabulations and data files were assembled and the text and tables for this report were prepared by the Regional Economic Information System Branch. Major responsibilities were assigned to Kathy A. Albetski, Wallace K. Bailey, and Gary V. Kennedy. Contributing staff members were H. Steven Dolan, Jeffrey L. Newman, Michael J. Paris, Albert Silverman, Nancy E. Smith, Callan S. Swenson, Monique B. Tyes, and Mary C. Williams.

Data availability

Personal income by type of payment, earnings by Standard Industrial Classification (SIC) division, population, and per capita personal income are available for metropolitan areas and counties for 1969–93 (see table A). Data are also available as follows: A version of the foregoing table that includes earnings by SIC two-digit industry; a set of tables that includes only the three summary statistics—personal income, per capita personal income, and population; and supplemental tables for employment by SIC division, for transfer payments by program, and for major categories of farm income and expenses.

The summary statistics are presented in *Local Area Personal Income, 1969–92*, which also presents a description of the sources and methods used to prepare the estimates and a list of the State agencies and uni-

versities from which the more detailed tables can be obtained.³

The entire set of the detailed and summary tables for all counties and metropolitan areas and for all years will be available on a CD-ROM by the end of May. This CD-ROM will also contain quarterly State estimates of personal income for 1969–94, gross state product estimates for 1977–92, projections of State and metropolitan area personal income and employment to 2040, and a description of the sources and methods used to estimate local area personal income. The CD-ROM is designed for use with microcomputers equipped with the MS-DOS operating system and in-

³ U.S. Department of Commerce, Bureau of Economic Analysis, *Local Area Personal Income, 1969–92* (Washington, DC: U.S. Government Printing Office, September 1994).

The 1991–92 estimates of personal income and the 1990–92 estimates of population and per capita personal income in that publication have been superseded by revisions.

^D Not shown to avoid disclosure of confidential information. Estimates are included in totals.

^L Less than \$50,000. Estimates are included in totals.

¹ 1988–93 based on 1987 SIC.

² Farm income consists of proprietors' net farm income, the wages of hired labor, the pay-in-kind of hired farm labor, and the salaries of officers of corporate farms.

³ Census Bureau midyear population estimates. Estimates for 1990–93 reflect State and county estimates available as of February 1995.

⁴ Personal contributions for social insurance are included in earnings by type and industry but excluded from

personal income.

⁵ U.S. adjustment for residence consists of adjustments for border workers: Income of U.S. residents commuting outside U.S. borders to work less income of foreign residents commuting inside U.S. borders to work plus certain Caribbean seasonal workers.

⁶ Includes the capital consumption adjustment for rental income of persons.

⁷ Includes the inventory valuation and capital consumption adjustments.

⁸ "Other" consists of wages and salaries of U.S. residents employed by international organizations and foreign embassies and consulates in the U.S.

cludes a program to help users select, display, print, and copy the tables. The price is \$35.00.

These tables are also available on magnetic tapes, computer printouts, and microcomputer diskettes. Each table for all years of data for all the metropolitan areas or for all the counties is available on a single reel of magnetic tape, but the table that includes earnings by SIC two-digit industry requires two reels at standard blocksize; the price of each reel of magnetic tape is \$100. The tables on computer printouts are priced by the number of pages; the minimum charge is \$10. The tables on diskette are priced at \$20 per diskette; as many as nine diskettes are required for all of the local areas in a given table series,

but users can limit their orders to the local areas in particular States.

In addition, the following information is free: A sample packet of all tables, a list of the State agencies and universities from which the State and local area estimates can be obtained, and a description of sources and methods used to prepare the local area estimates.

For information on ordering these products, write to the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 606-5360. Visa or Mastercard are accepted for telephone orders.

Tables 1 and 2 follow.
